SUMMARY

I am a motivated and detail-oriented Software Engineering student with proven experience in full-stack web development, IoT systems, and database management gained through academic projects, freelance work, and research contributions. I am proud to be the first author of an IEEE-published research paper on big data, and to have delivered an award-winning oral presentation at the ICBDA 2025 conference, all while in my second year of undergraduate studies. Through my academic journey, I demonstrated advanced skills in Python, C++, and data analysis, alongside practical project experience in building full-stack e-commerce and IoT solutions. Therefore, I am seeking a challenging developer role where I can apply my research and hands-on technical skills.

EDUCATION

BSc (Hons) Information Technology

Sep 2025 – Present

University of the West of England, Bristol, United Kingdom

- Pursuing First-Class Honors, specializing in modules related to Artificial Intelligence and Big Data Analytics
- Awarded an international student scholarship for outstanding academic performance in previous studies
- Building advanced, in-demand skills in data-driven systems, business computing, and advanced software development

Pearson BTEC Level 5 HND in Computing

Aug 2022 – Jan 2025

Info Myanmar College, Yangon, Myanmar

- Specialized in Software Engineering, completing the program with an overall Distinction grade
- Built a strong foundation in programming, system design, and database management through a practical, project-based curriculum
- Enhanced time management, problem-solving, and self-motivation by designing and building complex solo projects on my own
- Further developed crucial interpersonal skills, including teamwork, effective communication, and agile methodologies, through intensive, collaborative group projects

PUBLICATIONS & RESEARCH

Big Data Based House Fire Detection and Alarm System

Mar 2025

2025 the 10th International Conference on Big Data Analytics (ICBDA2025), Singapore, Singapore

- Led the academic research, system logic design, and co-authored the paper, focusing on the data-driven detection algorithm
- Implemented coding, live data collection and testing scripts using Python, C++, and the Arduino IDE to validate the system's accuracy
- Awarded for the excellent oral presentation, demonstrating strong communication and technical research skills
- Fully indexed and published in the IEEE Xplore digital library (<https://ieeexplore.ieee.org/document/11211344>)

PROFESSIONAL EXPERIENCES

General Assistant

Oct 2025 – Present

Iceland Foods, Bristol, United Kingdom

- Manage online order picking and processing, ensuring 100% accuracy and timeliness for customer deliveries
- In charge of stock replenishment, inventory control, and customer-facing Point-of-Sale (POS) transactions with high accuracy
- Developed strong time management, problem-solving, and communication skills in a fast-paced, customer-focused environment

Freelance Web Developer

Feb 2025 – Jul 2025

Crown Education, Yangon, Myanmar

- Guided GCSE students in their technical studies, using patient instruction and clear communication to help them achieve their academic goals
- Built and presented sample website projects to demonstrate how core code, such as HTML, CSS, and JavaScript functions in an actual website
- Provided support to students to complete their assignment projects successfully

ACADEMIC PROJECTS

IoT Based Fall Detection and Notification System

Aug 2025 – Jan 2025

Info Myanmar College, Yangon, Myanmar

- Designed and built the system all by myself, conducting primary research and user surveys to define functional requirements
- Programmed sensor logic and data transmission using C++ (Arduino IDE) and Python for data collection and analysis
- Engineered a multi-stage alert system that triggers a loud local alarm, detects falls with high accuracy, and sends instant notifications via a Telegram bot
- Achieved a Distinction grade for this module and participated in the university project show with other IoT projects under the title "Smart Home"

SOLECIAL – E-commerce Website for Sneakers

Aug 2025 – Oct 2025

Info Myanmar College, Yangon, Myanmar

- Developed a full-stack sneaker e-commerce site from scratch using HTML, CSS, JavaScript, PHP, Bootstrap, and a MySQL database
- Integrated all core functionalities, including user authentication (login/registration), dynamic product catalogues, shopping cart, and a secure checkout process
- Designed a responsive UI/UX inspired by leading brands like Puma and Adidas, focusing on a clean user journey

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, HTML5, CSS3, JavaScript (ES6+), TypeScript, PHP, SQL
- **Libraries & Frameworks:** React, Vue, Node.js, Express.js, Bootstrap, Tailwind CSS
- **Databases:** MySQL, MongoDB
- **Tools & Methods:** Microsoft Office, Git, VS Code, Arduino IDE, Agile Methodologies, REST APIs

PERSONAL SKILLS

Self-Motivation & Initiative	Problem Solving	Teamwork & Collaboration	Fast Learner
Time Management & Multitasking	Attention to Detail	Technical Communication	Analytical Skills

CERTIFICATES

CVS Health Retail Customer Service, CVS Health

Jun 2025

Google Digital Marketing & E-commerce, Google

Jul 2025

ADDITIONAL INFORMATION

- **Languages:**
 - English: Full Professional Proficiency
 - Burmese: Native Proficiency
 - Korean: Elementary Proficiency
- **Right to Work:** Eligible to work up to 20 hours per week during term time in the UK (Student Visa)
